ENGINEERING INDUSTRY  
& TRADE CO. LTD.

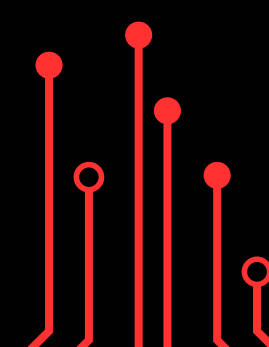

# ABOUT ASDTC

ASDTC Engineering is an defense industry and transportation technology company provided in Turkey; Sub-manufacturers that supply critical materials from domestic or abroad, support the latest innovations in electronic component / cabling and mechanical parts or materials, and are authorized or solution partners in quality network solution, cold chain product delivery, chemical materials, qualified cables and software technologies with a large capacity.

For Rail Vehicles; Locomotive doors, subway doors, power units and transport boxes belonging to these units have many recipes and designs that are patented with parametric wind-tunnel experiments while developing their control software.

All of our products are approved by accredited laboratories and have international certificates.

“Great Ideas Make Development Inevitable.”

# ASDTC VALUES

We like to be close to our customers. Together, we constantly set new industry standards by analyzing the needs of our customers. We leverage the opportunities provided by digitalization to provide automated solutions to help customers optimize their performance.

Our service solutions provide our customers with peace of mind and allow them to meet environmental requirements while maximizing uptime efficiency.

We are challenging the status quo with our business partnerships with more than 200 different companies and thousands of product ranges in the field of engineering.

We work to contribute to the growth rates of companies and to improve people's daily lives, thanks to our work, services and innovative products that are in demand from all sectors, within the framework of our respect for sustainable technology guided by our high ethical standards.

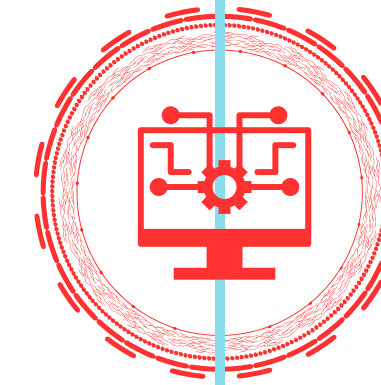

As ASDTC Engineering; We are committed to maintaining high standards in quality, safety and customer service by reflecting our core values in everything we do.

# VALUES

Custom Production with R&D  
Culture

Know-how transfer and A  
subject-matter experts

Timely and Safe Delivery

# OUR CHERISHED CLIENTS

Clients who have experienced our services and are satisfied with every solution we provide

ASPILSAN

TULOMSAS

ROKETSAN

ASELSAN

# Milestones

## Know-How Transfer

Establishment of ALSVEDA  
with Macedonian Veda  
Company

January 2023

## Batterybox

Nationalization of  
batterybox

2021

## Locomotive Door

Nationalization of  
locomotive door

2020

## DC Motor Import

Importation of DC motors which  
are high-quality DC motors  
equipped with powerful permanent  
magnets

2018

## Engineering Solution

Production of Custom Size  
integrated pulse capacitor  
and rechargeable lithium  
battery

2015

## Authorized Dealer

Distributorship agreements  
over than 10

2012

## ASDTC

Establishment and  
First Import in

2007

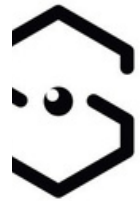

February  
2023
